small sketches which we blew up to min. 100cm length printing them

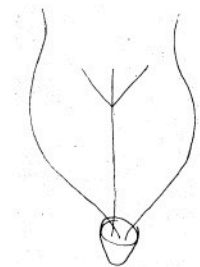

vista / glance

small computer drawings which we printed all approx. 130 x 80 cm

small sketches which we printed up two 200 cm length printing them

3 x 1 cm drawing, print appeox. 120 x 70 cm

resumen / brief description >

*cunst*, like calc-kunst (art) with c, was an ironic but also necessary play on visual arts. we urgently needed money in order to go on renovating the *mothership* (see file) and decided to try to make a tour from house to house in Vorarlberg, Austria (where omi was born..) to show tiny little drawings, or little prints from drawings we made with the computer. we proposed to the (mainly art collecting) people we visited to print their favorite drawing on a big scale an to let them decide then if they want to really buy it (all were around 400 - 800 €), and in case they would buy it they would receive together with the print a floppy disc with the 'original data' of the work and the copyleft to print it as big and as many they wanted. to our great surprise it worked, people liked this risk, and we could sell around 30 small images and go on for some good months concentrating us on the *mothership*.
