resumen / brief description >

because of an invitation of *Gallery Lisi Haemmerle* from Bregenz, Austria in 2004, which invited beside us nine other artists or -groups, we did elaborate the project *web-cam-ping(pong)*. Lisis idea was to have simultaneously 10 life-interventions via webcams, no theme, just the frame of her gallery in which all those tele-interventions were projected. for this event we organized a street party and invited all our neighbours to come, to celebrate and to greet Bregenz. during the six hours of this party, which we could broadcast in its full lenght to Bregenz, we projected onto a fine and half transparent curtain between the street and our open studio(garage)door videos that we recorded the same day: all images from the doors and Fassades of our neighbours houses. this not only transformed the Fassade of our studio into the 'whole neighbourhood' but also improved the relation with those neighbours.
