www.cyperhelvetia.ch - sketches for an interface for CYberhelvetia, a paticipative platform for an Expo project

design for the mobile office of a CY agent

resumen / brief description >

this file shows some screens from web interfaces we did. we are working in concepts, in the design and in the programation of web sites since 1994. since the start of *calc diseño CB* this kind of projects and jobs made it everytime more easy for us to survive as *calc* without losing our autonomy. the experiences we could make in spatial and architectural projects influenced these works a lot; and vice versa.
