poster, 70 x 100 cm as the KUB produced it

resumen / brief description >

this project arised by visiting the *KUBs* website and its webcam which we iniated during our work on *TIMEcloud* in 98 (see file). we liked how this building changes character and started to save each day a webcam image. then we simply combined them chronological over whole year. nothing special was planed with that, but when we visited Bregenz again and showed it to R.Sagmeister (curator) he proposed to make a poster print.
