## LUEGERINNER

de / by > **c\_able**\*

tiempo / time > 2010

campo / field > open call - architecture, public sphere, web

dirección / address > Dr. Karl Lueger Platz - Vienna  
ISBN: follows when the book is out..  
> <http://en.luegerplatz.com/index.html>

vista / glance

different sketches from our search getting the realtion changed - putting him down-under, changing his pyramid/pedestal of power into a black-memo-box, placing him in front of his pedestal in the grass..

simulations of the existing square and the redefined square

"Pasquino"  
in Rome  
which inspired  
us very much.

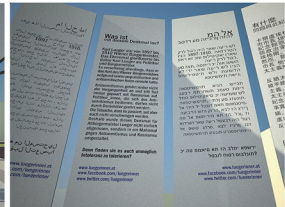

some simulations of the cylinders - open to be in\_formed by whosoever

the monument as it exists in Vienna since 1926 (images by Lilly Panholzer, Jakob Glasner - <http://luegerplatz.com/fotos.html>)

first simulation of the "trommel" and the cylinders which we developed then

simulations from our submission, showing the "Trommel" with its invitation-text in 25 languages

resumen / brief description > From the Open Call we felt invited by: Elections in Austria have shown just how much anti-Semitism continues to be politically instrumentalised by parties and social groups. Anti-Semitic statements by politicians are not only tolerated but also rewarded with votes. Anti-Semitism is usually a part of a more extensive racist rhetoric that attempts to make cheap populist points. History has shown us just how important it is to take action against all forms of anti-Semitism. Thus it is even more serious that in Vienna there is still a statue to a politician who, over a century ago, used anti-Semitism as a political strategy in order to secure a power base for himself in the city. The statue to the former mayor, Lueger, cannot be allowed to romanticise history any longer. It should be transformed into a monument against anti-Semitism and racism.[...] read the complete text under <http://en.luegerplatz.com/index.html>

for this call we developed a complex redefinition of the whole square and its "relationality" of its monuments protagonism, for this occasion we formed spontaneously the group-group **c\_able** (see below) with which we want to do more collaborations in the future, please write us - c\_ables@calcaxy.com - if you want to see the complete PDF of our proposal. in the meantime the jury took its desicion and LUEGERINNER is not the proposal which is going to be realized, but the one Klemens Wihldal was presenting - congrats Klemens! you can see it under <http://luegerplatz.com/index.html>
