resumen / brief description >

after twenty years of calculating art and culture, and after two years that we were leaving Seville, we are announcing our so far most ambiguous project: **the sabbaticalc decade!** the project consists in nothing, this might sound empty but is full of all, our way-way proposed it itself > bye bye Seville, we have to leave! Teresa moves with Topi and Lola to Widnau - CH, omi moves with Pam to Puglia - I, Malex moves with Salome to Bern - CH, Dani leaves the group and moves to Mexico for some months. we split without splitting, but we also see that all these re_boots mean a pause, a big one, and that's fine with us, because we always liked more what is, than what should be. in the meantime we'll keep our friendships sailing strong, take care of our home-image-blog and will take care of the flame which heated our center for so many years. we'll be back, because we never have gone. c you!
